

Number_guessing_game

1. This document Contains the output pages of my Number_guessing_game task.
2. I have used python tkinter(GUI) for this task for the better user Experience

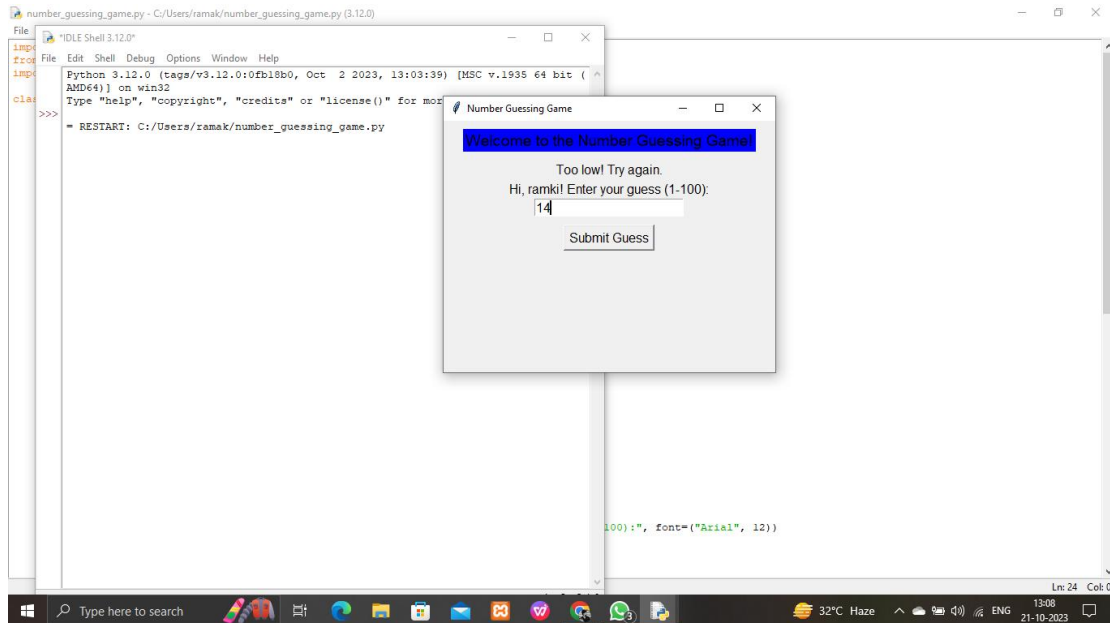

Firstly the user have to enter their name;

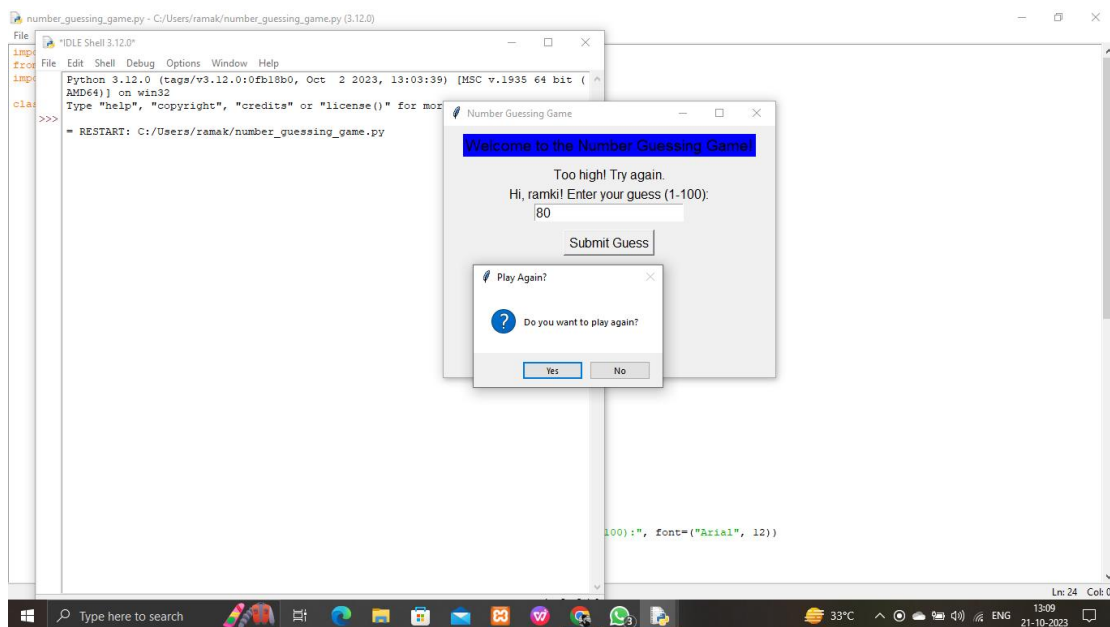

Now the User can start the guessing game:

After that you are ready to enter your guessings;

If u are completed the whole 10 attempts the system will show you whether you are win or lose ;

If u want to play again you can press yes or else press no..

This is the simple and user friendly number guessing game that I did in the first week.
